## **NAMI SF Mental Health Resource Guide for Culturally Diverse Populations**

### **Introduction**

This Cultural Resource Library was created by the National Alliance on Mental Illness (NAMI) San Francisco to provide information about mental health resources for diverse populations, specifically people who identify as Asian & Asian American, Black & African American, Latinx, LGBTQ+, and Seniors. We have included local, Bay Area-specific resources, as well as links to more general resources that are available nationwide.

While we know this list of resources is not comprehensive, we have tried to include those that are available to a wide range of San Francisco residents and for the most part have not included private practices. We at NAMI SF know how challenging it can be to find support for mental health issues, especially for historically oppressed and underserved communities, so we hope this guide will provide helpful resources in your times of need.

### **How to Use This Guide**

On the following page, you will find a Table of Contents. You can use this to navigate through the guide by clicking on the category or specific resource you are interested in. From here, you will find information such as the resource’s website, a general description of services, and contact information.

#### ***Please Note:***

*While many of the organizations listed provide a range of services, we have only specifically included mental health services available for youth and their families. Services at*

*organizations change frequently so please make sure to contact each organization before visiting to ensure listed services are still provided and/or to obtain updated information.*
